

Weather and closings

On bad wintery days the following should be considered before making a trip to the library.

A level 3 means that the library will be closed or will be closing due to the definition of a level 3.

During a level 2 the library director will make a determination as to the status of the library. As evening comes and the temperature drops it may be necessary to close early, while there are some methods we can use to update our status it depends upon the staff available at the time and the situation. We try to use Twitter, Cancellations.com and wtv9.com events cancelled for a quick announcement, but these are all electronic. Our phone system may also be changed to say closed at the circulation desk response. While we give it our best effort there may still be times that it is impossible to make notification of our being closed.

PLEASE CALL before you make the trip if you have any doubts.

Thank you for your patience during these cold snowy days and we are sorry for any inconvenience. .

Sheila Perkins, Director
